Introducing ... New Product

Differential Pressure Sensor (DPS)

**5 New
SKUs**

Walker Products Differential Pressure Sensors (DPS) measure the pressure difference between exhaust gas in the inlet and outlet of the Diesel Particulate Filter (DPF). The sensing element of the DPS is piezo resistive where the sensor changes its electrical resistance based upon the mechanical deformation of the internal membrane.

Walker Products DPS are designed to meet or exceed OE specifications. Our sensors have been tested for cyclic operation at high and low pressure in extreme conditions, vibration and shock resistance, humidity and temperature endurance, as well as thermal shock.

Each DPS is also tested for leakage and voltage performance. In some cases, failure to replace a defective DPS can result in: unnecessary filter regenerations, power loss, reduction in filter life, increased pollution levels, or an increase in oil consumption. Always replace a defective sensor with a quality Walker Products DPS.

WALKER PRODUCTS • 525 WEST CONGRESS STREET • PACIFIC, MO 63069
