

Automechanika Preview

June 2019

Walker Products will be exhibiting again at this year's Automechanika Birmingham event. They will be at Stand E114 from June 4th – 6th showcasing their latest technological advancements and product line expansions. As a global leader in Engine Management products for diesel and petrol applications, Walker can provide increased coverage & return on investment with their offerings and support. Walker will be highlighting their product ranges in the following categories: Lambda Sensors, Exhaust Gas Temperature Sensors, Cam & Crank Position Sensors, Differential Pressure Sensors, and Mass Air Flow Sensors.

Walker Products remains committed to supplying the industry with products that are manufactured to meet and exceed OEM standards and specifications. This effort is backed by their internal manufacturing, product management, and engineering staff. Their goal is to ensure all aspects of their business are maintained and accurate in the production of quality parts, comprehensive vehicle applications, and technical support.

As a Tec-Doc certified data supplier, Walker is continually expanding its European product offering within the cataloguing platform. Walker Products strives to serve the UK and European marketplace with unmatched quality, service, and support.

The company is encouraging visitors to contact them to secure one-on-one meetings at the information provided here.
