About Us

Walker Products began supplying the fuel system needs of the automotive industry in 1946. Today Walker is one of the largest privately owned manufacturers of fuel system components and engine management devices.

We serve major Original Equipment Manufacturers, Co-manufacturers, Rebuilders, and Retail customers in the fuel, engine management and exhaust markets worldwide.

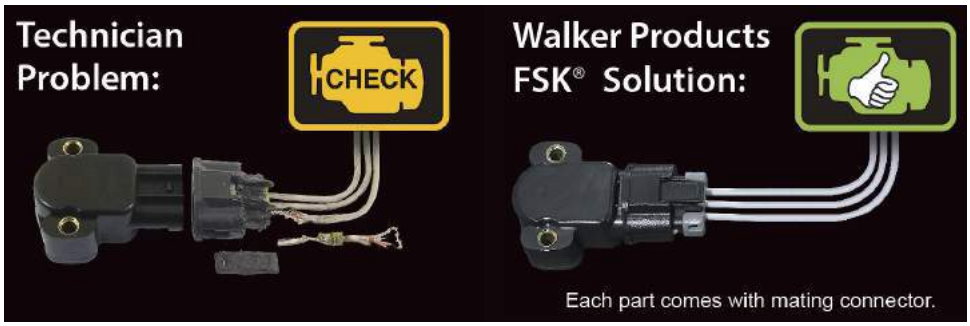

Walker Products' offerings include Carburetor and Fuel Injection repair kits, Oxygen sensors, Exhaust Gas Temperature sensors and other engine management products such as Cam & Crank position sensors, Knock sensors, Throttle Position sensors, Mass Air Flow sensors, Manifold Absolute Pressure sensors, Engine Coolant Temperature sensors, Fuel Injectors, Fuel Pressure Regulators and much more.

We are committed to supplying products manufactured to meet or exceed OEM standards and specifications. This effort is backed by our own manufacturing, product management and engineering staff to ensure it is maintained and accurate in the production of quality parts, vehicle applications, instruction sheets and technical support.

ISO 9001 CERTIFIED QUALITY SYSTEM IATF 16949

Full Service Kits®

Walker Products Announces Innovative Advancement in Engine Management Sensors

With its new Full Service Kit® now available, Walker announces a totally new concept in selling an engine management sensor solution to satisfy the customer needs and demands in making sure they can do the job right the first time.

What is a Full Service Kit®?

A Full Service Kit® contains not only the base sensor, but also provides the technician and DIY'er with the mating connector and pigtail . . . we even include the butt splices and heatshrink to ensure a watertight connection.

We are now offering 260+ SKUs in the following key product categories:

- Throttle Position Sensor
- Intake Air Temperature Sensor
- Engine Coolant Temperature Sensor
- Idle Air Control Motor
- Manifold Absolute Pressure Sensor
- Camshaft/Crankshaft Position Sensor
- Vehicle Speed Sensor

Why a Full Service Kit®?

For the technician, it saves time in completing the job, without searching for the mating connector and pigtail, reducing rack time making for happy customers and higher profits. For the DIY'er it saves a trip back to the parts store, dealership or salvage yard to buy the mating connector and pigtail.

For the store it reduces deliveries and side trips to dealerships to buy the mating connector and pigtail leading to reduced returns and comebacks, higher profits and satisfied customers.

Air Charge Temperature Sensors (ACT)
Ambient Air Temperature Sensors (AAT)

DESCRIPTION
Measures air temperature through changing resistance and sends this information to the onboard computer. The computer uses this and other inputs to calculate the correct amount of fuel delivered.

SYMPTOMS OF FAILURE
No start, engine flooding, poor fuel economy and steady “check engine” light.

RECOMMENDED SERVICE
Should be performed every 25,000 to 35,000 miles and consists of cleaning or replacing non-functional sensors.

NOTES

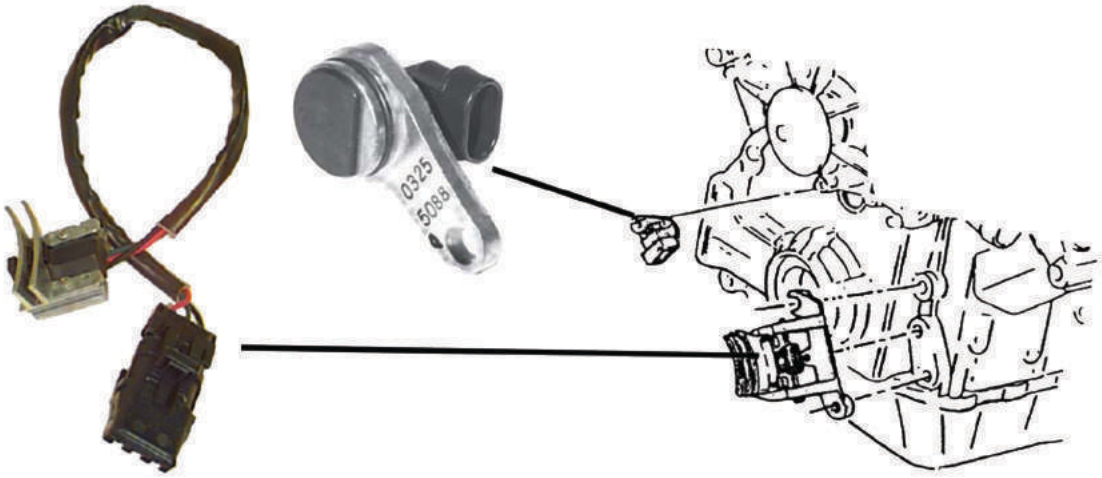

walkerproducts.com

Camshaft Position Sensors (CMP)
Crankshaft Position Sensors (CKP)

DESCRIPTION
Determines the camshaft and crankshaft position and sends this information to the onboard computer. The computer uses this and other inputs to calculate injector on time and ignition system timing.

SYMPTOMS OF FAILURE
"Check engine" light, hard starting and poor vehicle driveability.

RECOMMENDED SERVICE
There is no scheduled service. Part must be replaced when failure occurs.

NOTES

walkerproducts.com

ENGINE COOLANT TEMPERATURE DEVICES

Engine Coolant Temp Sensors (ECT)

Engine Coolant Level Sensors (ECL)

Engine Coolant Temperature Senders (CTS)

Engine Cooling Fan Switches (CFS)

Engine Cylinder Head Temperature Sensors (CHT)

DESCRIPTION

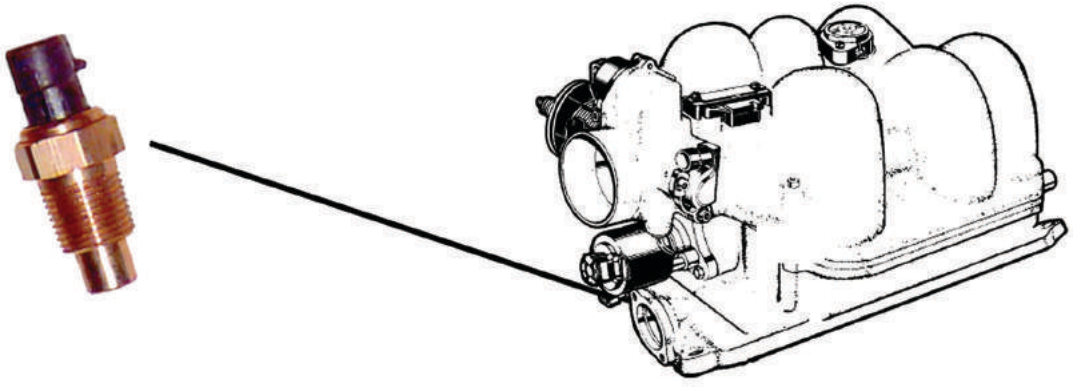

Measures coolant temperature through changing resistance and sends this information to the onboard computer. The computer uses this and other inputs to calculate the correct amount of fuel delivered.

SYMPTOMS OF FAILURE

No-start, engine flooding, poor fuel economy and steady "check engine" light.

RECOMMENDED SERVICE

Should be performed every 25,000 to 35,000 miles and consists of cleaning or replacing non-functional sensors.

Oil Pressure Sensors (OPS)

DESCRIPTION
Monitors the internal oil pressure of an engine, alerting you to any issues via a visual pressure read out on an in dash gauge or by illuminating a “low oil” safety light on the dash.

SYMPTOMS OF FAILURE
Illuminated “low oil” light on when visual inspection insures there is a proper amount of oil in the crankcase. An oil pressure gauge which reads and behaves erratically, displaying either zero or max oil pressure.

RECOMMENDED SERVICE
Replacement of the sensor should be performed when the sensor becomes non functional or displays the symptoms listed above.

Engine Variable Valve Timing Solenoid (VVT)

Engine Variable Valve Timing Sprocket (VTS)

DESCRIPTION
Alters timing to improve engine performance, fuel economy, and emissions.

SYMPTOMS OF FAILURE
Loss of fuel economy/higher fuel consumption, lack of power and torque, and "check engine" light on.

RECOMMENDED SERVICE
Change engine oil and replace the variable valve timing solenoid.

IDLE AIR CONTROL DEVICES
Idle Air Control Motors (IAC)
Throttle Air Bypass Valves (TABPV)
Idle Speed Control Motors (ISC)

DESCRIPTION
A stepper motor controlled by the onboard computer. The computer moves the pintle in and out of an opening that bypasses the throttle blade. This allows the computer to presicely control idle speed when varying loads are placed on the engine.

SYMPTOMS OF FAILURE
Engine stalling, surging, poor idle conditions and a “check engine” light.

RECOMMENDED SERVICE
Check for proper operation with each tune-up, replace when trouble codes indicate failure.

NOTES

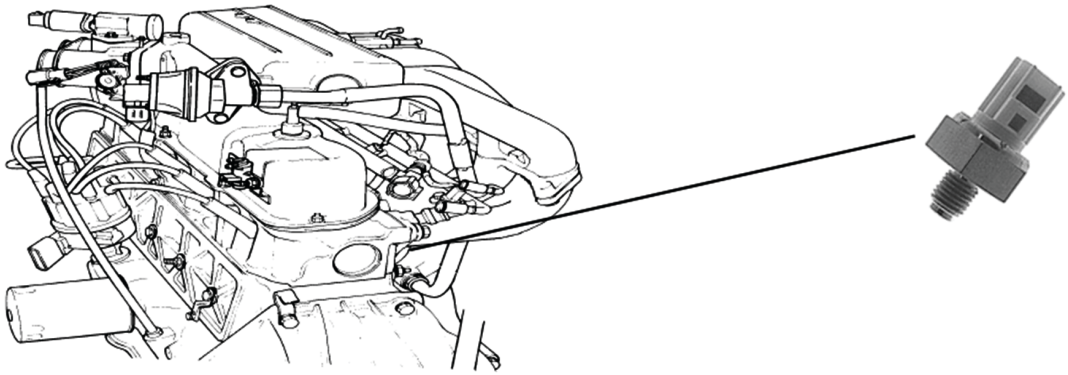

walkerproducts.com

Knock Sensors (KS)

DESCRIPTION
Detect engine block vibrations caused from engine knock and sends a signal to the computer to retard ignition timing.

SYMPTOMS OF FAILURE
Engine knock or loss of power.

RECOMMENDED SERVICE
Check connection and signal from sensor when engine knock or pinging develops.

NOTES

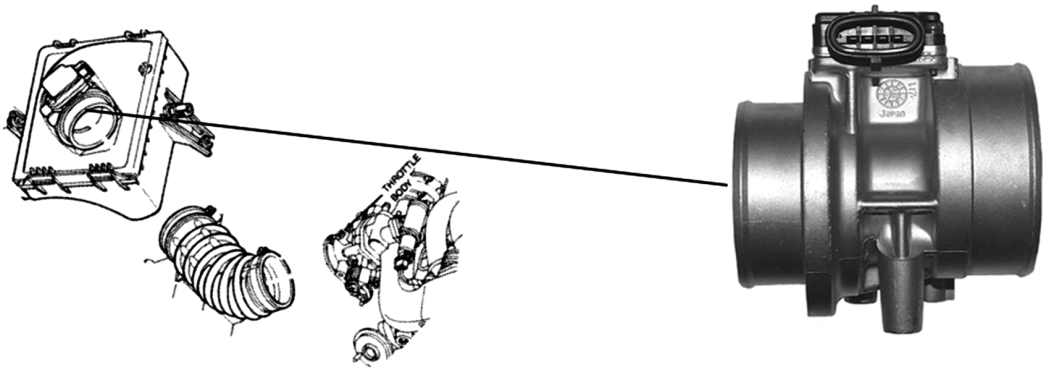

walkerproducts.com

Mass Air Flow Sensors (MAF)
Hot Film or Hot Wire Anemometer

DESCRIPTION
MAF measures the amount of air by weight through changing voltages or frequencies and sends this information to the onboard computer. The computer uses this and other inputs to calculate the correct amount of fuel delivered.

SYMPTOMS OF FAILURE
Poor starting, engine surging, engine stalling, “check engine” light, and no-start conditions.

RECOMMENDED SERVICE
Sensors are non-servicable. Replace sensors that are non-functional.

NOTES

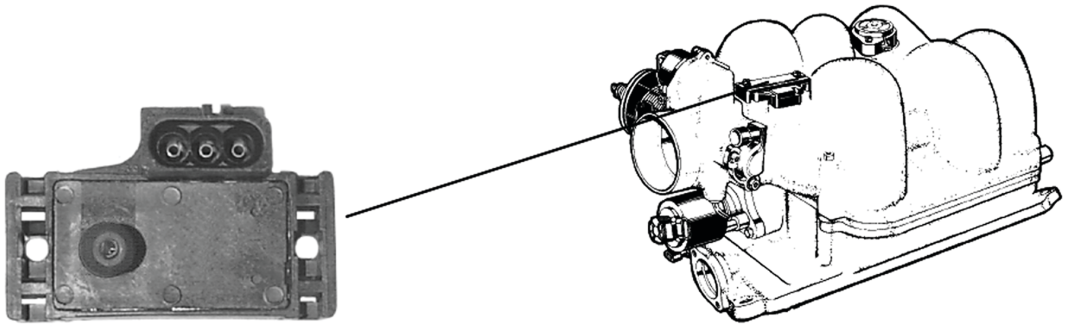

walkerproducts.com

PRESSURE SENSORS
Manifold Absolute Pressure Sensors (MAP)
Barometric Pressure Sensors (BPS)
Fuel Tank Pressure Sensors (FTP)

DESCRIPTION
MAP measures manifold pressure and BPS measures barometric pressure through changing voltage and sends this information to the onboard computer. The computer uses this and other inputs to calculate the correct amount of fuel delivered.

SYMPTOMS OF FAILURE
Poor starting, detonation, "check engine" light, and no-start conditions.

RECOMMENDED SERVICE
Sensors are non-servicable. Replace sensors that are non-functional.

Throttle Position Sensors (TPS)

DESCRIPTION
Measures throttle position through changing voltage and sends this information to the onboard computer. The computer uses this and other inputs to calculate the correct amount of fuel delivered.

SYMPTOMS OF FAILURE
Poor starting, improper automatic transmission convertor lockup, engine stumbling, stalling and a "check engine" light.

RECOMMENDED SERVICE
There is no scheduled service for TPS sensors. These are non-servicable. Replace when failure occurs.

NOTES

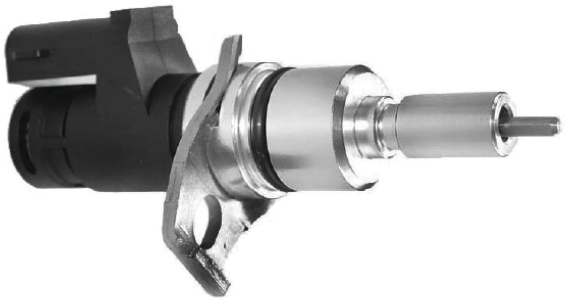

walkerproducts.com

Vehicle Speed Sensors (VSS)

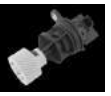

DESCRIPTION
Sends electrical pulses to the computer, pulses which are generated through a magnet that spins a sensor coil. When the vehicle's speed increases, the frequency of the pulse also increases.

SYMPTOMS OF FAILURE
Hesitation, surging or improper shifting, loss of cruise control or speedometer.

RECOMMENDED SERVICE
Check connections and check for proper output signal. Replace if faulty.

LOCATIONS INCLUDE:
- Front of Transmission
- Rear of Transmission
- Rear Differential
- Front Transaxle
- Transfer Case

Comprehensive Engine Management Solutions

- Carburetion Repair Kits and Accessories
- Fuel Injection Repair Kits and Accessories
- Oxygen Sensors, Bungs and O2 Tools
- Ignition Wire Sets
- Coil-On-Plug Boots
- Ignition Coils
- Coil-On-Plug
- Exhaust Gas Temperature Sensors
- Engine Management Components:
  ACT Sensors, ECT Sensors, Cam and Crankshaft Position Sensors, EGR Valve Position Sensors, EGR Valve Pressure Sensors, MAP Sensors, MAF Sensors, Throttle Position Sensors, EGR Valves, IAC Motors, TABPV, Fuel Pressure Regulators, TBI and Port Fuel Injectors, Fuel Seal Repair Kits and High Temperature Sensors.

ISO 9001 CERTIFIED QUALITY SYSTEM IATF 16949
