

ThunderCore™ PRO

Walker Products is dedicated to serving the global automotive markets with unsurpassed service as your first choice in quality products.

Walker Products is introducing a new ignition wire program and has set a debut date for this November 2019. New and fully reconstructed, ThunderCore™ PRO will be Walker's new all makes all models wire offering that strictly conforms to OE fit, form and function. Through dedicated research and development, Walker identified the needs of the aftermarket for an all-inclusive product line. ThunderCore™ PRO will contain over 650 part numbers, ensuring a true all makes all models program.

The ThunderCore™ PRO product line consists of OE style replacement ignition wires, each specifically engineered to the vehicle and manufacturer requirements. To ensure unsurpassed quality, Walker Products operates its own ISO 9001 certified manufacturing facility in the U.S.A. for all their ignition wires. All wire sets are made with superior materials, from the cable cores, to the high temperature resistant outer jacketing, to the stainless steel terminal ends; all aspects of the new program conform to original manufacturers specifications.

What does this mean?

Vehicle manufacturers engineer ignition systems to precisely operate to the needs of the particular engine in the vehicle. That being said, different vehicles and engine configurations require different ignition systems; and this is not to exclude the ignition wires.

Due to the various demands of today's technologically advanced vehicles, it is more important than ever to provide quality products that are specifically engineered to those needs. Offering "one size fits all" programs is simply no longer a viable option for many automotive repairs today.

Walker's solution was an ignition wire program that provides an exact OE replacement match for each vehicle. For instance, while some vehicle applications may require a MAG Core wire, that option would not be the best choice for those other applications needing a Suppression Core wire; this is simply because vehicle ignition systems are designed differently.

YOUR FIRST CHOICE IN QUALITY PRODUCTS

Manufacturing

With their own ISO 9001 certified manufacturing facility, Walker is able to strictly control the quality of their ignition wires to ensure exact OE fit, form, and function – no matter the application. Additionally, all of Walker's ignition wire sets are 100% physically and electrically tested during production to ensure the highest quality and reliability reaches the end consumer.

Trusted Experience

Walker Products has a dedicated ignition wire team with over fifty years of combined experience in the manufacturing of standard and custom wire sets. Walker offers a full range of assembly processes capable of producing long or short run wire set orders, adding additional flexibility to meet the demands of all types of customers. In addition to the typical automotive ignition wires, the team offers experience in building custom sets including prototype samples, high performance, off road, industrial, agricultural, marine, small engine, and many other specialized market applications. Walker Products' primary goal is to ensure that customers receive the highest quality products, that are manufactured to their needs with exceptional turnaround times.

YOUR FIRST CHOICE IN QUALITY PRODUCTS

From single lead to 16-cylinder applications, Walker's production facility in Palmetto, Florida can handle all your ignition wire set and wire component part needs.

Industry Leader

With origins beginning in 1946, Walker Products has grown to be a global leader of oxygen sensors, fuel delivery components, ignition coils, ignition wire sets, and engine management products in the automotive, fleet service, heavy duty, and Othermotive® markets.

With over 90 product categories and 400 team members worldwide, Walker claims its position as one of the largest, privately owned automotive aftermarket companies today.

The Walker team excels in providing our customers with unsurpassed service by remaining dedicated to professionalism, quality, and support.

For all of your ignition system needs, rely on Walker as *Your First Choice In Quality Products*.
