

IGNITION CAPS & ROTORS

Walker Products offers extensive coverage of premium replacement ignition distributor caps and rotors. These ignition items ensure proper engine performance by supplying each engine cylinder with the correct amount of voltage from the ignition coil. Ignition distributor caps and rotors are essential tune-up components that should be replaced when installing Walker's ThunderSpark® Ignition Coils and ThunderCore®PRO Ignition Wire Sets.

- Exact OE Style Construction
- Meets and exceeds OE Fit, Form, and Function
- Corrosion resistant materials for longer service life
- Application coverage from 1960 through the latest models
